European Journal of Operational Research 90 (1996) 638–639

EUROPEAN JOURNAL OF OPERATIONAL RESEARCH

Contents Volume 90

1 Practical aspects of route planning for magazine and newspaper wholesalers (Invited Review)
R. Dillmann, B. Becker and V. Beckefeld
13 Scheduling for a multifunction phased array radar system
A.J. Orman, C.N. Potts, A.K. Shahani and A.R. Moore
26 Tactical design of rail freight networks. Part I: Exact and heuristic methods
A. Marín and J. Salmerón
45 A restricted dynamic programming heuristic algorithm for the time dependent traveling salesman problem
C. Malandraki and R.B. Dial
56 An efficient algorithm for facility location in the presence of forbidden regions
S.E. Butt and T.M. Cavalier
71 Optimizing solid waste collection in Brussels
T. Kulcar
78 An axiomatic characterization of some locations in trees
R. Vohra
85 VARMAX-modelling of blast furnace process variables
R. Östermark and H. Saxén
102 Generalized bilinear programming: An application in farm management
J.M. Bloemhof-Ruwaard and E.M.T. Hendrix
115 Interactions between members of a marketing–production channel under seasonal demand
V.S. Desai
142 Determination of paths to vendor market efficiency using parallel coordinates representation: A negotiation tool for buyers
C.A. Weber and A. Desai
156 Computational approximations of renewal process relating to a warranty problem: The case of phase-type lifetimes
E.P.C. Kao and M.S. Smith
171 A stocking policy for spare part provisioning under age based preventive replacement
A.B.M.Z. Kabir and A.S. Al-Olayan
182 Dynamic setup reduction in production lot sizing with nonconstant deterministic demand
J.-D. Hong, S.-L. Kim and J.C. Hayya

Feature Issue: Project Management and Scheduling

197 Project Management and Scheduling
W.S. Herroelen and E.L. Demeulemeester
200 Local search heuristics for single-machine scheduling with batching to minimize the number of late jobs
H.A.J. Crauwels, C.N. Potts and L.N. Van Wassenhove
214 Polynomial algorithms for resource-constrained and multiprocessor task scheduling problems
P. Brucker and A. Krämer
227 The two-machine total completion time flow shop problem
F. Della Croce, V. Narayan and R. Tadei
238 Two branch and bound algorithms for the permutation flow shop problem
J. Carlier and I. Rebaï
252 Extending the shifting bottleneck procedure to real-life applications
P. Ivens and M. Lambrecht
269 A computational study of constraint satisfaction for multiple capacitated job shop scheduling
W.P.M. Nuijten and E.H.L. Aarts
285 A graph colouring model for assigning a heterogeneous workforce to a given schedule
V. Valls, A. Pérez and S. Quintanilla

303 A branch and bound algorithm for minimizing the number of crossing arcs in bipartite graphs
V. Valls, R. Martí and P. Lino
320 Serial and parallel resource-constrained project scheduling methods revisited: Theory and computation
R. Kolisch
334 An efficient optimal solution procedure for the preemptive resource-constrained project scheduling problem
E.L. Demeulemeester and W.S. Herroelen
349 A new and efficient heuristic for scheduling projects with resource restrictions and multiple execution modes
F.F. Boctor
362 A framework for an interactive project scheduling system under limited resources
G. Ulusoy and L. Özdamar
376 DAGEN: A generator of testsets for project activity nets
M.K. Agrawal, S.E. Elmaghraby and W.S. Herroelen

383 Inspection games in arms control (Invited Review)
R. Avenhaus, M. Canty, D.M. Kilgour, B. von Stengel and S. Zamir
395 Cost-effective sulphur emission reduction under uncertainty
A. Altman, M. Amann, G. Klaassen, A. Ruszczyński and W. Schöpp
413 A simulation model for emergency evacuation
M. Pidd, F.N. de Silva and R.W. Eglese
420 Determining dominant wind directions
S.Z. Selim and A.H. Al-Rabeh
427 Applying the flow-capturing location-allocation model to an authentic network: Edmonton, Canada
M.J. Hodgson, K.E. Rosing and A.L.G. Storrier
444 Location-allocation on a line with demand-dependent costs
Z. Drezner and G.O. Wesolowsky
451 Robustness of the efficient DMUs in data envelopment analysis
J. Zhu
461 Preference voting and project ranking using DEA and cross-evaluation
R.H. Green, J.R. Doyle and W.D. Cook
473 A decision-support model for investment decisions in new ventures
B.A. Jain and B.N. Nag
487 A survey of business failures with an emphasis on prediction methods and industrial applications
A.I. Dimitras, S.H. Zanakis and C. Zopounidis
514 On the methodology of the World Competitiveness Report
M. Oral and H. Chabchoub
536 Residence exchange wanted: A stable residence exchange problem
Y. Yuan
547 On the optimal spacing of currency denominations
L. van Hove and B. Heyndels
553 On the measurement of technical efficiency in the public sector
J. Ruggiero
566 Efficiency of the Turkish Stock Exchange with respect to monetary variables: A cointegration analysis
Y.G. Muradoglu and K. Metin
577 Using neural networks to forecast the systematic risk of stocks
H.-G. Wittkemper and M. Steiner
589 Strategic new product pricing when demand obeys saturation effects
E.J. Dockner and A. Gaunersdorfer
599 A differential game model of a market of substitutable products
D.W.K. Yeung
609 The system dynamics of future warfare
J. Moffat
619 A new model of conflict analysis – the three dimensional graph model
Y. Wu, D. Cheng and M. Wolfe
625 Monotone second-best optimal contracts
G.E. Monahan and V. Vemuri

638 Contents Volume 90
